

According to the IMO G8 regulation, to satisfy the standard amount of test organisms ($> 50 \mu\text{m}$ and $10 \sim 50 \mu\text{m}$), DOC, POC and TSS, augmentation system was installed at Land-based test facility (See the red mark of below drawing). When the natural seawater is put into the test water tank, collected aquatic organisms using plankton net are put into the test water tank.

See the next page of this document for detailed information

(Augmentation system)

(Plankton net)
